

Your Overall Website Score

Your website is doing a solid job overall, and most visitors can find their way around without much trouble. There are a few areas holding you back, though – mainly how quickly pages load and how easily new customers can find you on Google. Working towards fixing these core issues would make a real difference.

How easy your site is to use

Best Practices

Website safety and upkeep

Google Ranking

How well Google finds you

What's Working Well

- ✓ Pages load at a decent speed for most visitors on a good connection.
- ✓ Your site looks great and works smoothly on mobile phones.
- ✓ Your contact details are clear and easy to find.

What Needs Attention

- ⚠ Your website doesn't show up when people search for your type of business on Google.
- ⚠ Some large images are slowing your pages down
- ⚠ Visitors on slower connections wait noticeably longer for pages to open.
- ⚠ A few links on your site lead to pages that no longer exist.

OUR RECOMMENDED NEXT STEPS

Help your business appear on Google searches

Right now you're not on the first page – we'll fix the settings that help local customers find you.

HIGH

Shrink and update your images

Better optimised images will make your pages open faster and lift your overall speed score straight away.

HIGH

Tidy up your page descriptions and links

Clearer descriptions help Google show your site, and fixing broken links keeps visitors from hitting dead ends.

MEDIUM

Google Maps pin needs to be adjusted

Having the Google Maps pin directly over your business will ensure your customers arrive at the right place.

LOW
